

Appendix # - Gas Readings in App - Explanation of How Up/Down Pattern Emerges

This appendix shows - using a spreadsheet - how the App Gas Readings (and therefore the Octo- internal system(s)) acquired the up/down readings pattern that is visible between October 2024 and June 2025 is the Gas Readings section of the Octopus Application.

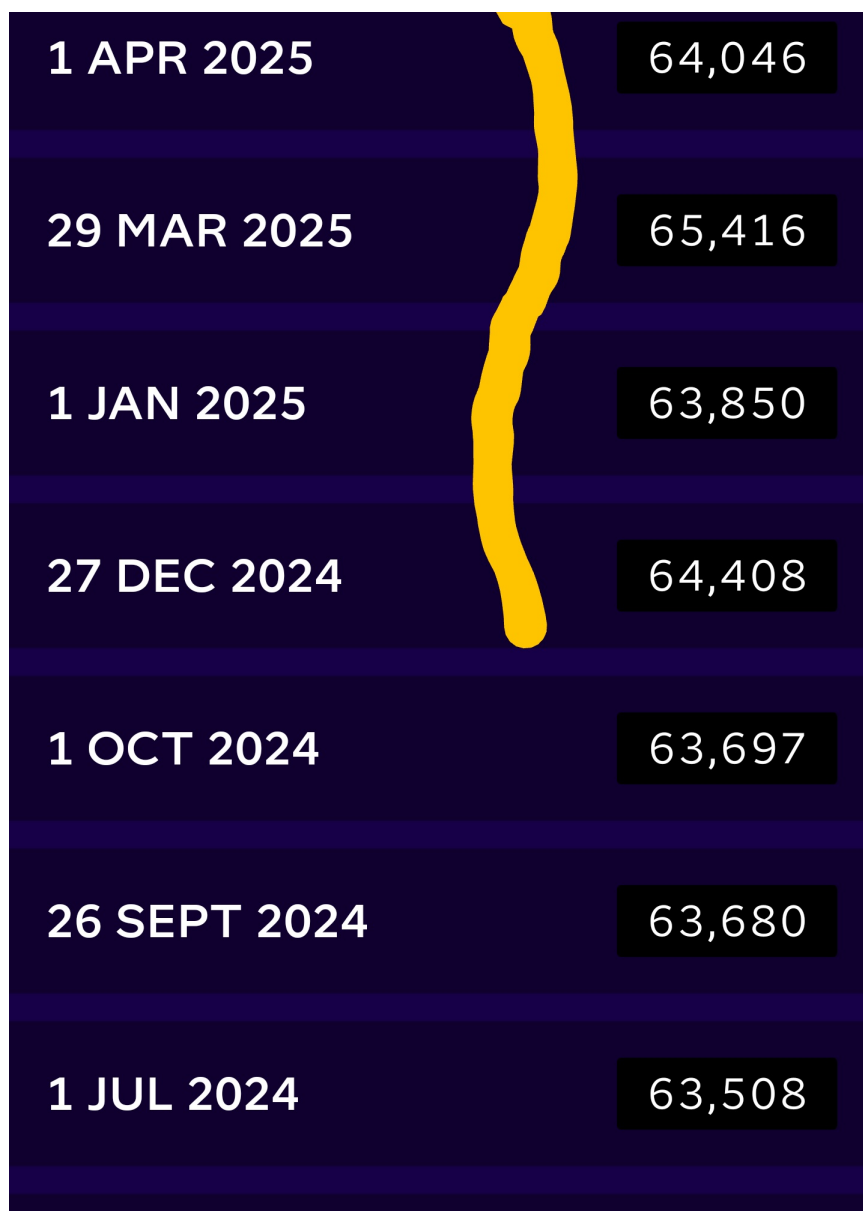

In this appendix: * Screenshot of the very confusing Octopus App values for the aforementioned time period. * Spreadsheet showing the (somewhat convoluted) mapping between the App Readings (see last point) the origins of the values in RefRefundedBill1, RefRefundedBill2 and RefRefundBill.

See Appendix RefApXRefundAllBills for details of the bills referred to herein (XXX-MERGE)

Octopus App gas readings Dec-24 to July-25

17 DEC 2025	64,546
1 OCT 2025	64,305
16 SEPT 2025	64,287
1 JUL 2025	64,151
29 JUN 2025	65,837
16 JUN 2025	64,120

Caption

The yellow line on the previous image shows the Octopus App gas readings around the time of the refunding of part of the overcharge due to over-estimates. The values between December 2024 and July 2025 go up and down, in a manner one would not associate with monotonically increasing gas meter readings.
