The costs that make up energy bills

- Buying the energy our customers use 52%
- Delivering the energy to your home 24%
- Government environmental and social schemes 8%
- Looking after you which includes billing, customer service and IT systems 6%
- VAT 5%
- Our supply business profit 5%

Illustration based on information from SSE's Consolidated Segmental Statements published from 2010-2013 which are available on our website. Average costs per energy bill weighted to reflect our customer base (59% electricity, 41% gas). Costs will vary depending on fuel(s), region and tariff.

About your TCR

Your Tariff Comparison Rate (TCR) is 5.19p per kWh

The TCR is a figure which lets you compare the price of your current tariff with different tariffs from us or other suppliers. The figure is based on an average annual usage of 13,500.00 kWh for gas. It takes into account the unit rate, standing charge, VAT and any discounts that make up your tariff. It does not include any exit fees. The TCR is not based on your personal usage and so should only be used as a guide. The actual costs you pay will depend on the amount of energy you use.

Call us or visit our website for more details of your tariff and the calculation of the TCR.
