Hi Mark,

There's an outstanding balance of -£1,130.03 on your account, and you don't have a Direct Debit set up.

It's easy to make a card payment online <https://octopus.energy/pay/> - or you can set up a Direct Debit in a few clicks using your online account <http://octopus.energy/login>.

We recommend setting up a Direct Debit for a few reasons:

- You could be saving up to £80 a year on your bills*, find out why <https://octopus.energy/help-and-faqs/articles/some-tariffs-cheaper-direct-debit/>
- Most people use less energy in summer, and more in winter. Paying by Direct Debit means you have one consistent payment, no matter the time of year.
- Paying a set amount every month makes it easier to budget.

*Based on national averages for a medium household of 2,700 kWh of electricity and 11,500 kWh of gas.

If you set up a Direct Debit you can also use our Balance Forecast tool <https://octopus.energy/dashboard/new/accounts/balance-forecast>. It's helped lots of our customers understand more about how energy payments affect your account balance.

Want to pay some other way? No problem, have a look at all our different options here. <https://octopus.energy/help-and-faqs/articles/what-payment-methods-do-you-offer/>

Fuel Direct allows you to pay for energy directly through benefit payments. We can make an application for Fuel Direct payments to be taken on your behalf.

Need some extra support? If you or someone you live with needs help managing your energy supply we can add you to the Priority Services Register. <https://octopus.energy/policies/priority-services-register/>

If you've got any questions or need anything else, please get in touch so we can help. Just reply to this email, or give us a call on our freephone number 0808 164 1088.

Kind regards,
The Octopus Credit Team

P.S. check out our energy saving tips, which have helped customers just like you save £££s on their energy bills. <https://octopus.energy/blog/energy-saving-tips/>
