This is how we convert gas units into kilowatt hours (kWh):

666.00 metric units used  
 x 1.022640 volume correction  
 = 681.07 corrected units  
 x 39.0 calorific value  
 ÷ 3.6 to convert to kWh  
 = 7,378.25 kWh

## About your TCR

### Your Tariff Comparison Rate (TCR) is 5.49p per kWh

The TCR is a figure which lets you compare the price of your current tariff with different tariffs from us or other suppliers. The figure is based on an average annual usage of 13,500.00 kWh for gas. It takes into account the unit rate, standing charge, VAT and any discounts that make up your tariff. It does not include any exit fees. The TCR is not based on your personal usage and so should only be used as a guide. The actual costs you pay will depend on the amount of energy you use.

Call us or visit our website for more details of your tariff and the calculation of the TCR.
