Energy prices from January 2024 and what they mean for you

Dear Mark,

As a result of global gas prices, Ofgem (the energy regulator) has announced energy unit rates will rise from January 1 to March 31 2024. **Once again, Octopus prices are lower.** You will continue to receive the cheapest standing charges of any large supplier.

For a typical home, these unit rate increases will add £8 a month to energy bills from January to March. You'll find a personalised breakdown of your new rates in this document.

If you're struggling to pay your bills, we have support available - please let us know and we'll do our best to help.

We're not adjusting your payments at this point. We continually check your balance and payments, and will suggest changes if it looks like you're paying too much or too little.

You can also check our unique Balance Forecast in your online account to get a sense of whether your monthly payments are set at a sensible level and adjust them if helpful.

We know prices are already high, and this increase is coming just as the cold weather sets in. If you are struggling with your bills, please get in touch – you can apply or find out more about our support fund, standing charge help, or our electric blanket scheme at <https://octo.ps/crisis-support>.

It's also worth considering switching tariff or supplier – we're offering fixed rate tariffs that are cheaper than the January to March prices. The prices we can offer can change suddenly, as the wholesale market is so volatile currently.

Smart tariffs can also help you save. If you can use less electricity during the 4-7pm peak each day, then Agile Octopus could be good for you. Alternatively, Octopus Tracker updates prices daily based on the latest wholesale rates, and offers good value at the moment. Drop us an email to **hello@octopus.energy** if you'd like to find out more.

Yours sincerely,

The Octopus Energy team

Electricity

Meter-point 2000000755375

Meter details	
Property	28 Waldegrave Road, London, W5 3HT
MPAN	2000000755375
Current tariff name	Flexible Octopus
Current tariff code	E-1R-VAR-22-11-01-H
Annual consumption	4,042.7 kWh

Your new prices

	Current prices until 31st December 2023	New prices from 1st January 2024
Electricity		
Standing charge (per day)	47.954p	47.954p
Unit rate (per kWh)	27.511p	28.790p

	Current prices until 31st December 2023	New prices from 1st January 2024
Your estimated annual cost		
Electricity (£51.71 annual increase)	£1,287.21	£1,338.92
