*** this particular refunded-bill-2 value

*** seems to have been lost completely.

*** which sadly adds to the confusion.

64120 customer reading on 17/06/25
(slight date misalignment of no real consequence)

Summary: the app data contains a rag bag of old a new values – which is ... 'confusing...'

however even that is not consistent as one particular value is lost completely.

an 'unsual' approach that is not even applied in a consistent manner.

this may – perhaps - be why Octopus refused to give any information regarding any of this.

however that is speculation and must be taken as such.

fact: it took me 15+ hours to work thru the various bills, app data and try to work out what they done to effect my refund
