Octo.2026.3.1
Octo.2026.3.2
Octo.2026.3.3

Dear Sir/Madam,

Further to my formal complaints referenced above, I would appreciate it if you could address the questions below on a numbered, per-question basis.

These questions relate to the three complaint areas previously raised. For clarity, I have grouped them by topic.

“SQ” denotes supplementary questions. References such as DD.P01 etc. refer to points raised in my earlier communications.

1. DIRECT DEBIT / METER / COMPLAINT HANDLING

My Ref: Octo.2026.3.1

DD.SQ1

Please provide the dates, types (actual/estimated) and sources of all meter readings used for this account over the past 24 months, and confirm whether an actual meter reading was obtained at least once every 12 months.

DD.SQ2

Please explain how Direct Debit levels were determined during periods where estimated readings were used, including the inputs, assumptions and methodology applied to calculate projected usage and payment amounts.

DD.SQ3

Please explain how Direct Debit levels were reviewed and adjusted following receipt of actual meter readings, including what changes were made to projected usage, account balance forecasts and payment levels as a result.

DD.SQ4

Please provide the installation date, and the full inspection, maintenance and any fault or replacement history of the gas meter associated with this account, including dates, findings and any actions taken.

DD.SQ5

Please address each issue and question raised (by reference to my IDs, e.g. DD.P01–DD.P03 and DD.SQ1–DD.SQ6), including the actions taken, findings and current status for each.

DD.SQ6

Please confirm whether your complaints process permits a complaint to be closed where substantive issues remain unresolved, and if so, under what conditions. Please also confirm whether this has occurred or is intended in relation to my earlier complaints.

Please also see: DD.P01–DD.P03

2. AVRO FINAL BILL / BALANCE TRANSFER

My Ref: Octo.2026.3.2

AVRO.SQ1

Please provide a detailed breakdown of how the corrective credit of £831.49 applied to my account was calculated, including the underlying units, rates, billing periods and any adjustments applied.

AVRO.SQ2

Please explain the basis on which the Avro balance continued to be treated as a debt following the application of a substantial corrective credit, including the account balance position before and after the adjustment.

AVRO.SQ3

Please describe the verification and due diligence performed on the Avro balance prior to its application to my account, including what checks were carried out, what data was relied upon, and whether any validation against underlying billing records was performed.

AVRO.SQ4

Please describe the formal mechanism by which the Avro account was transferred to Octopus, including the data sources used, the format of the data received, and whether any reconciliation or transformation was applied before it was incorporated into my account.

AVRO.SQ5

Please explain the basis on which the residual balance of £293.44 was added to my account in November 2024, including what triggered this entry at that time, what period it relates to, and how the amount was calculated.

Please also see: AVRO.P04

3. REFUND / OVER-ESTIMATION / REBILLING

My Ref: Octo.2026.3.3

REF.SQ1

Please describe the methodology used to calculate refunds following overestimated usage, including the steps taken and inputs used (units, rates, periods), and how corrected charges are derived from original estimates.

REF.SQ2

Please explain how unit rates are determined and applied when recalculating charges across a period spanning multiple tariffs, including how usage is allocated to each tariff period and how the applicable rates are applied.

REF.SQ3

Please confirm whether original tariff rates at the time of consumption are used when recalculating charges, and if not, please explain what alternative method is applied and how this affects the resulting charges.

REF.SQ4

Please explain the basis on which the correction was applied from October 2024 onwards, including what triggered the correction at that point and why earlier periods were not included.

REF.SQ5

Please confirm when the elevated consumption estimates were first generated, and describe the methodology and inputs used to produce those estimates.

REF.SQ6

Please provide a full reconciliation of the rebilling process in a structured format (per billing period), including for each affected period (covering the full period over which estimated usage was applied, not limited to the most recent billing cycle):

- original units, rates and charges
- reversed amounts
- rebilled units, rates and charges

REF.SQ7

Please confirm, with reference to the reconciliation provided, that all reversed charges were credited at the original rates, and demonstrate that the rebilling process has not resulted in any financial disadvantage to me.

REF.SQ8

Please provide a clear, step-by-step explanation of the calculation process used to derive the revised charges, referencing the reconciliation data provided.

REF.SQ9

Please explain how the time period selected for correction was determined, including whether it is considered that overestimation occurred only within that period, and if so, on what basis. Please also confirm how any ongoing or future billing reflects this correction, and whether any further adjustments would be made if earlier periods were subsequently identified as affected.

Please also see: REF.P06

I look forward to receiving your responses to the above.

Yours faithfully,
Mark C. Cope
