Energy prices from July 2025 and what they mean for you

Dear Mark,

Flexible Octopus prices **will fall around £120 a year** for a typical home from July 1. We continue to be the only large supplier to set our default standing charges meaningfully below the Ofgem Price Cap.

You'll find a personalised breakdown for you in this document. As ever, we'll monitor your payments and suggest a change if it looks like you're paying too much or too little.

If you are struggling with your bills, please let us know – you can apply or find out more about our support fund, standing charge help, or our electric blanket scheme at <https://octo.ps/crisis-support>.

You can start saving sooner, and **shave a further £40 a year** (for a typical home) by fixing your prices. Fix online or contact us via the details on this document.

Smart tariffs can also help you save. If you can use less electricity during the 4-7pm peak each day, then Agile Octopus could be good for you. Alternatively, Octopus Tracker updates prices daily based on the latest wholesale rates. Drop us an email to **hello@octopus.energy** if you'd like to find out more.

Yours sincerely,

The Octopus Energy team
