Energy prices from April 2024 and what they mean for you

Dear Mark,

From April 1 2024, for Flexible Octopus, unit rates will fall significantly. However, Ofgem announced a further small increase to standing charges. We will not pass on the full standing charge increase - we continue to be the only large supplier to set standing charges meaningfully below the Ofgem Price Cap.

Overall, this means energy bills will fall by around £238 per year for a typical home from April. You'll find a personalised breakdown in this document.

If you're struggling to pay your bills, we have support available - please let us know and we'll do our best to help.

We're not adjusting your payments right now. As ever, we'll monitor your payments and **automatically suggest a reduction** if it looks like you're paying too much.

You can also check our unique Balance Forecast in your online account to get a sense of whether your monthly payments are set at a sensible level and adjust them if helpful.

We know energy bills are still far too high. If you are struggling with your bills, please get in touch - you can apply or find out more about our support fund, standing charge help, or our electric blanket scheme at <https://octo.ps/crisis-support>.

It's also worth considering switching tariff or supplier - we're offering fixed rate tariffs that are available now at the April prices, with no exit fees.

Smart tariffs can also help you save. If you can use less electricity during the 4-7pm peak each day, then Agile Octopus could be good for you. Alternatively, Octopus Tracker updates prices daily based on the latest wholesale rates, and offers good value at the moment. Drop us an email to **hello@octopus.energy** if you'd like to find out more.

Yours sincerely,

The Octopus Energy team
